

Empowering Indian Healthcare Value chain

Who we are

Carepact is a healthcare supply chain platform which aggregates demands from multiple hospitals to facilitate bulk order discounts on every service or procurement.

OUR SERVICES

CarePact provides a turn-key purchasing solution to hospitals and clinics. Member hospitals gain access to advanced supply chain management methodologies and state-of-art technology solutions to automate Procure-To-Pay activities.

01 Process Automation

Our Data Driven Algorithms and Machine Learning capabilities would automate hospital's Purchase-to-pay functionalities to increase the efficiency and optimize human resources.

02 Inventory Optimization

Care Pact makes use of Data Driver Algorithms and Machine Learning capabilities to optimize your hospital's inventory. We eliminate Overstock, Out-Of-Stock, and Dead Inventory at your hospital/clinic.

03 Group purchasing services

Pricing of a product is impacted by quantity of purchase, frequency and shipment cost and payment terms. Small and medium hospitals/clinics lack higher volume and skilled resources to efficiently manage their supply chain.

04 Supply Chain Finance

CarePact helps small/medium hospitals to realize higher profit margins and cash-on-delivery discounts. To achieve this, we need to ensure vendors get paid on product delivery. Our supply chain finance solution through our partner banks will be a perfect solution.

BENEFITS

Bulk Order Discount

Reduce your purchase spend up to 30%.

Eliminate Overstock

Accurate demand predictions to maintain optimal inventory.

No More Out-of-Stock

Automated procure to pay functionality.
